### Top Issues

|         |                                                               |                                  |
|---------|---------------------------------------------------------------|----------------------------------|
| Med     | <b>Avoid an excessive DOM size</b> TBT                        | 1,996 elements                   |
| Med-Low | <b>Serve static assets with an efficient cache policy</b>     | Potential savings of 136KB       |
| Low     | <b>Use passive listeners to improve scrolling performance</b> | 1 event listener not passive     |
| Low     | <b>Reduce JavaScript execution time</b> TBT                   | 282ms spent executing JavaScript |
| Low     | <b>Avoid large layout shifts</b> CLS                          | 5 elements found                 |

#### Focus on these audits first

These audits likely have the largest impact on your page performance.

Structure audits do not directly affect your Performance Score, but improving the audits seen here can help as a starting point for overall performance gains.

### Page Details

Total Page Size - 1.49MB

Total Page Requests - 53

HTML JS CSS IMG Video Font Other

### How does this affect me?

Modern web users have a short attention span and expect a fast and seamless website experience. Delivering that fast experience can result in more traffic, more conversions, and more happiness.

As if you didn't need more incentive, **Google use Page Speed and Page Experience (including Web Vitals) signals in their ranking algorithm.**

### About GTmetrix

GTmetrix was developed as a tool for customers to easily test the performance of their webpages.

Page scores

Page metrics

Page sizes and request counts

The waterfall chart displays the loading behaviour of your site in your selected browser. It can be used to discover simple issues such as 404's or more complex issues such as external resources blocking page rendering.

## Automodel Store

## Performance Metrics

### First Contentful Paint

How quickly content like text or images are painted onto your page. A good user experience is 0.9s or less.

Good - Nothing to do here

341ms

### Time to Interactive

How long it takes for your page to become fully interactive. A good user experience is 2.5s or less.

Good - Nothing to do here

452ms

### Speed Index

How quickly the contents of your page are visibly populated. A good user experience is 1.3s or less.

Good - Nothing to do here

936ms

### Total Blocking Time

How much time is blocked by scripts during your page loading process. A good user experience is 150ms or less.

Good - Nothing to do here

53ms

### Largest Contentful Paint

How long it takes for the largest element of content (i.e., a hero image) to be painted on your page. A good user experience is 1.2s or less.

Good - Nothing to do here

723ms

### Cumulative Layout Shift

How much your page's layout shifts as it loads. A good user experience is a score of 0.1 or less.

Good - Nothing to do here

0.05

| IMPACT  | AUDIT                                                                                 |                                  |
|---------|---------------------------------------------------------------------------------------|----------------------------------|
| Med     | Avoid an excessive DOM size <small>TBT</small>                                        | 1,996 elements                   |
| Med-Low | Serve static assets with an efficient cache policy                                    | Potential savings of 136KB       |
| Low     | Use passive listeners to improve scrolling performance                                | 1 event listener not passive     |
| Low     | Reduce JavaScript execution time <small>TBT</small>                                   | 282ms spent executing JavaScript |
| Low     | Avoid large layout shifts <small>CLS</small>                                          | 5 elements found                 |
| Low     | Avoid enormous network payloads <small>LCP</small>                                    | Total size was 1.49MB            |
| Low     | Defer offscreen images                                                                | Potential savings of 377KB       |
| Low     | Avoid long main-thread tasks <small>TBT</small>                                       | 2 long tasks found               |
| Low     | Reduce unused JavaScript <small>LCP</small>                                           | Potential savings of 245KB       |
| Low     | Efficiently encode images                                                             | Potential savings of 5.20KB      |
| Low     | Reduce unused CSS <small>FCP</small> <small>LCP</small>                               | Potential savings of 123KB       |
| Low     | Serve images in next-gen formats                                                      | Potential savings of 321KB       |
| Low     | Properly size images                                                                  | Potential savings of 169KB       |
| Low     | Use video formats for animated content <small>LCP</small>                             | Potential savings of 150KB       |
| Low     | Avoid chaining critical requests <small>FCP</small> <small>LCP</small>                | 2 chains found                   |
| Low     | Ensure text remains visible during webfont load <small>FCP</small> <small>LCP</small> | 1 font found                     |
| N/A     | Largest Contentful Paint element <small>LCP</small>                                   | 720 ms                           |
| N/A     | Avoid serving legacy JavaScript to modern browsers <small>TBT</small>                 | Potential savings of 90B         |
| N/A     | Eliminate render-blocking resources <small>FCP</small> <small>LCP</small>             | Potential savings of 0 ms        |
| N/A     | Minimize main-thread work <small>TBT</small>                                          | Main-thread busy for 845ms       |
| N/A     | Reduce initial server response time <small>FCP</small> <small>LCP</small>             | Root document took 12ms          |
| N/A     | User Timing marks and measures                                                        |                                  |
| N/A     | Reduce the impact of third-party code <small>TBT</small>                              |                                  |
