Top Issues

|          |                                                        |         |                              |
|----------|--------------------------------------------------------|---------|------------------------------|
| Med-High | Avoid an excessive DOM size                            | TBT     | 2,078 elements               |
| Low      | Serve static assets with an efficient cache policy     |         | Potential savings of 94.5KB  |
| Low      | Use passive listeners to improve scrolling performance |         | 1 event listener not passive |
| Low      | Ensure text remains visible during webfont load        | FCP LCP | 1 font found                 |
| Low      | Avoid chaining critical requests                       | FCP LCP | 2 chains found               |

Focus on these audits first

These audits likely have the largest impact on your page performance.

Structure audits do not directly affect your Performance Score, but improving the audits seen here can help as a starting point for overall performance gains.

Page Details

Total Page Size - 1.11MB

Total Page Requests - 55

How does this affect me?

Modern web users have a short attention span and expect a fast and seamless website experience. Delivering that fast experience can result in more traffic, more conversions, and more happiness.

As if you didn't need more incentive, **Google use Page Speed and Page Experience (including Web Vitals) signals in their ranking algorithm.**

About GTmetrix

GTmetrix was developed as a tool for customers to easily test the performance of their webpages.

## Page scores

## Page metrics

## Page sizes and request counts

The waterfall chart displays the loading behaviour of your site in your selected browser. It can be used to discover simple issues such as 404's or more complex issues such as external resources blocking page rendering.

|                                                                          |     |                      |        |  |  |  |  |  |      |
|--------------------------------------------------------------------------|-----|----------------------|--------|--|--|--|--|--|------|

## Performance Metrics

### First Contentful Paint

How quickly content like text or images are painted onto your page. A good user experience is 0.9s or less.

Good - Nothing to do here

304ms

### Time to Interactive

How long it takes for your page to become fully interactive. A good user experience is 2.5s or less.

Good - Nothing to do here

594ms

### Speed Index

How quickly the contents of your page are visibly populated. A good user experience is 1.3s or less.

Good - Nothing to do here

794ms

### Total Blocking Time

How much time is blocked by scripts during your page loading process. A good user experience is 150ms or less.

Good - Nothing to do here

97ms

### Largest Contentful Paint

How long it takes for the largest element of content (i.e., a hero image) to be painted on your page. A good user experience is 1.2s or less.

Good - Nothing to do here

783ms

### Cumulative Layout Shift

How much your page's layout shifts as it loads. A good user experience is a score of 0.1 or less.

Good - Nothing to do here

0.02

| IMPACT   | AUDIT                                                          |                                  |
|----------|----------------------------------------------------------------|----------------------------------|
| Med-High | <b>Avoid an excessive DOM size</b> TBT                         | 2,078 elements                   |
| Low      | <b>Serve static assets with an efficient cache policy</b>      | Potential savings of 94.5KB      |
| Low      | <b>Use passive listeners to improve scrolling performance</b>  | 1 event listener not passive     |
| Low      | <b>Ensure text remains visible during webfont load</b> FCP LCP | 1 font found                     |
| Low      | <b>Avoid chaining critical requests</b> FCP LCP                | 2 chains found                   |
| Low      | <b>Properly size images</b>                                    | Potential savings of 57.1KB      |
| Low      | <b>Reduce unused CSS</b> FCP LCP                               | Potential savings of 123KB       |
| Low      | <b>Efficiently encode images</b>                               | Potential savings of 6.34KB      |
| Low      | <b>Reduce unused JavaScript</b> LCP                            | Potential savings of 249KB       |
| Low      | <b>Serve images in next-gen formats</b>                        | Potential savings of 65.0KB      |
| Low      | <b>Reduce JavaScript execution time</b> TBT                    | 310ms spent executing JavaScript |
| Low      | <b>Avoid enormous network payloads</b> LCP                     | Total size was 1.11MB            |
| Low      | <b>Defer offscreen images</b>                                  | Potential savings of 65.4KB      |
| Low      | <b>Avoid long main-thread tasks</b> TBT                        | 2 long tasks found               |
| N/A      | <b>Reduce initial server response time</b> FCP LCP             | Root document took 14ms          |
| N/A      | <b>Minimize main-thread work</b> TBT                           | Main-thread busy for 954ms       |
| N/A      | <b>Eliminate render-blocking resources</b> FCP LCP             | Potential savings of 0 ms        |
| N/A      | <b>Avoid large layout shifts</b> CLS                           | 5 elements found                 |
| N/A      | <b>Largest Contentful Paint element</b> LCP                    | 780 ms                           |
| N/A      | <b>Avoid serving legacy JavaScript to modern browsers</b> TBT  | Potential savings of 67B         |
| N/A      | <b>Reduce the impact of third-party code</b> TBT               |                                  |
| N/A      | <b>User Timing marks and measures</b>                          |                                  |
