Focus on these audits first

These audits likely have the largest impact on your page performance.

Structure audits do not directly affect your Performance Score, but improving the audits seen here can help as a starting point for overall performance gains.

Page Details

Total Page Size - 1.95MB

Total Page Requests - 50

How does this affect me?

Modern web users have a short attention span and expect a fast and seamless website experience. Delivering that fast experience can result in more traffic, more conversions, and more happiness.

As if you didn't need more incentive, **Google use Page Speed and Page Experience (including Web Vitals) signals in their ranking algorithm.**

About GTmetrix

GTmetrix was developed as a tool for customers to easily test the performance of their webpages.

This line chart displays three metrics over a period of time from July 19, 12:15AM to July 19, 12:17AM. The left Y-axis represents size in MB (488KB, 977KB, 1.43MB, 1.91MB, 2.38MB), and the right Y-axis represents the number of requests (40, 45, 50, 55, 60). The legend indicates three data series: HTML Size (red line), Total Page Size (blue line), and Requests (green line).

Time	HTML Size (KB)	Total Page Size (MB)	Requests
Jul 19 12:15AM	488	2.38	50
Jul 19 12:16AM	488	2.25	50
Jul 19 12:17AM	488	1.91	50

The waterfall chart displays the loading behaviour of your site in your selected browser. It can be used to discover simple issues such as 404's or more complex issues such as external resources blocking page rendering.
